

# \$CESAR Whitepaper

## Who is CESAR?

**CESAR is king of the meme jungle and punisher of bad actors!** In a crypto world full of scams and rug pulls, CESAR rises as the alpha chimp to restore order with **fairness, fun, and fire memes**. No more empty hype —this is about real community, real vibes, and real justice. **Bad actors beware**, CESAR's mission is to create a space where blockchain tech and memes unite, paving the way for **mass adoption**.

# Why CESAR is set for success?

## 1. Backed by Krystal:

Unlike most meme tokens, CESAR is supported by **Krystal**, a reputable liquidity provisioning platform that processed **\$600M in LP volume in 2024**. This backing adds credibility and a foundation of **real-world success** to the project, making CESAR more than just a meme—it's a **movement** with substance.

## 2. Fair Launch Mechanism with Anti-Bot Protection:

CESAR's launch is built on **fairness and transparency**, with **90% of liquidity** provided upfront to the liquidity pool, giving the community full ownership from the very beginning. The remaining **10%**—earmarked as a reward for meme creators—will be **burned**, reinforcing the project's dedication to a **rug-free, community-led ecosystem**.

To ensure a **snipe-free launch**, CESAR is being launched on **Liquid.Fun**, which prevents unfair bot activity. But we go a step further by integrating **Gitcoin Passport**, a proven anti-bot verification system. This ensures that only **real, verified users** can participate in the token sale, **filtering out bots** and giving **true community members** the opportunity to buy in early, preventing price manipulation and artificial spikes.

### 3. Deflationary Tokenomics:

CESAR isn't just about fun—it's designed for long-term value growth. With a **max burn mechanism**, all revenue from LP fees and liquidity withdrawal will be used to **buy and burn \$CESAR**, reducing the token supply over time. This **deflationary pressure** creates scarcity, which, coupled with continuous demand, fuels **organic price appreciation**. CESAR's deflationary model ensures a **stable price floor**, rewarding loyal holders while discouraging short-term speculation.

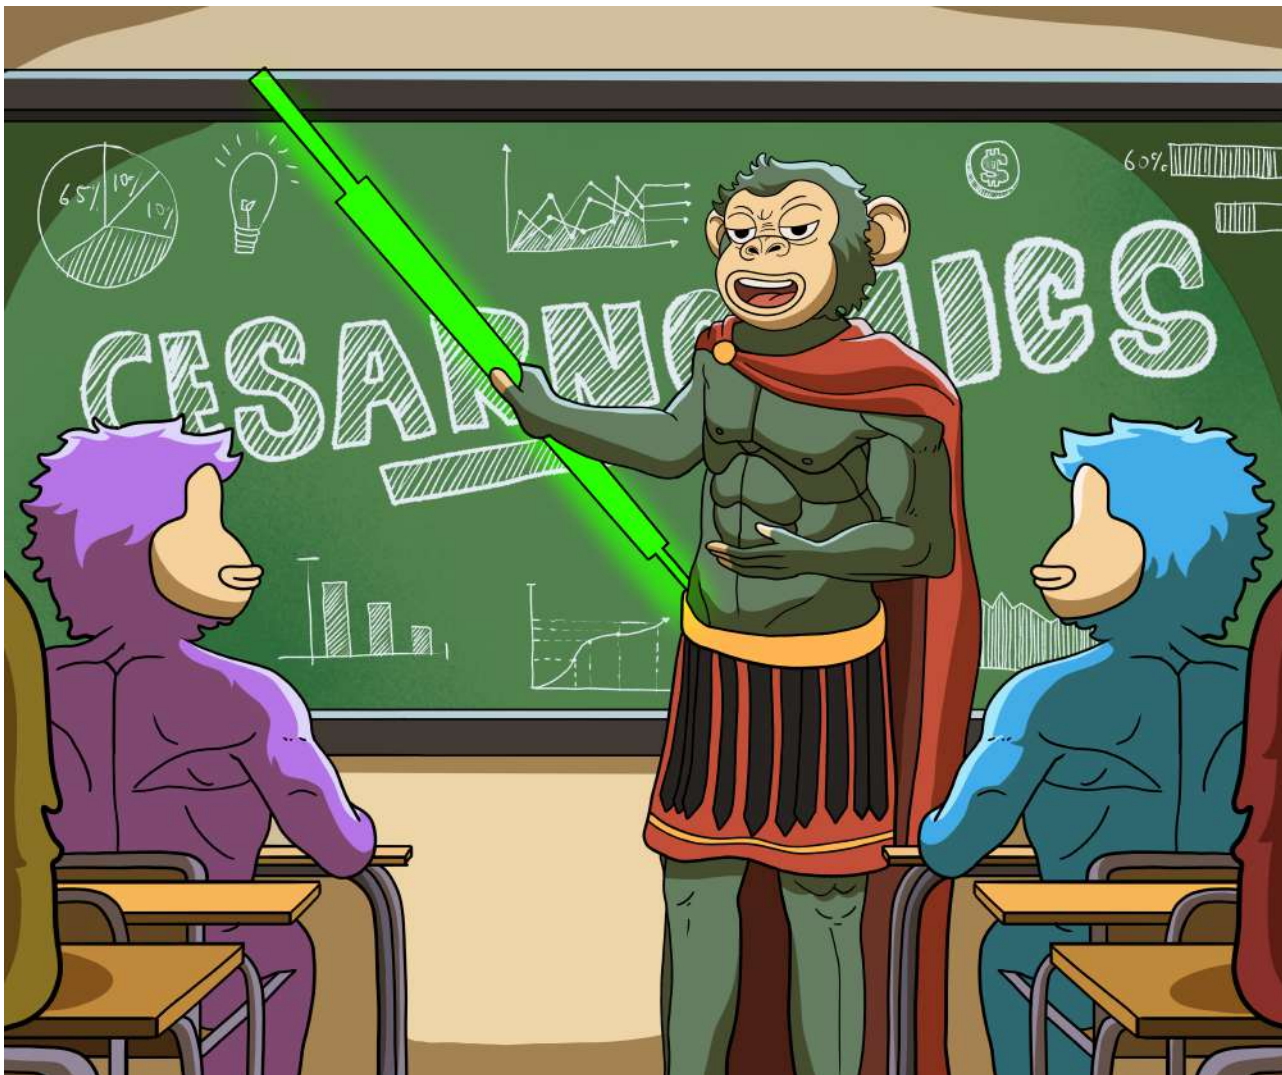

## 4. Community-Driven Governance:

CESAR Empire embraces a **Community-Driven Governance** model that puts holders in the driver's seat. Top holders, known as **Whales**, will join the **Krystal team as meme strategists**, using their insights and leadership to guide the community. Those who demonstrate their capabilities may take full control, leading CESAR to new heights.

Additionally, all community members will have a voice—important decisions will be put to a vote, ensuring that the collective will of holders shapes the project's future. With CESAR, every holder is part of an empire, ready to make waves in the meme world!

# What is \$CESAR tokenomics?

1. **Chain:** Base
2. **Total Supply:** 69B
3. **Launcher:** [Liquid.Fun](#)
4. **Buy/Sell Tax:** 0%
5. **Allocation:**
  - **90% in liquidity**
    - 30% in FDV range [\$690 - \$69K]
    - 30% in FDV range [\$69K - \$6.9M]
    - 30% in FDV range [\$6.9M - \$690M]

10% held by [Liquid.Fun](#) as performance reward to project team at the end of each FDV range (same for all other tokens launched there) → Our team will burn all \$CESAR reward immediately when we receive it.

## 6. Utilities:

By holding \$CESAR, you become part of the **Legionary** to build \$CESAR empire the greatest of all. Your stake grants you access to exclusive perks based on your holding percentage:

**1. Hold  $\geq 0.5\%$  supply:** Eligible to be considered for Legate role. Benefits for Legates:

- Lead the empire with Krystal team (possible for full handover from Krystal team if Legates show strong commitment and capability to push the community).
- Receive a personalized CESAR Profile Picture (PFP) tailored to your preferences.

**2. Hold  $\geq 0.1\%$  supply:** Eligible to be considered for Centurion role. Benefits for Centurions:

- Enjoy exclusive perks, private campaign access, and unique privileges within the CESAR empire.
- Receive a **customized Centurion PFP** as a mark of your rank and contribution.

## What are the roles in \$CESAR empire?

## How can I buy CESAR?

1. \$CESAR will be launched on [Liquid.Fun](#) in the first week of November
2. To buy in the first FDV range [\$690 - \$69K]:
  - You can only buy on [Liquid.Fun](#)
  - Your wallet need to pass humanity check by have 20+ points on Gitcoin Passport. Link to check your humanity score [HERE](#)
  - You can buy maximum 0.1% total supply
3. To buy from \$69K FDV onwards:
  - You can buy on both [Liquid.Fun](#) and [Uniswap](#)
  - No humanity score needed. All wallets can participate.
  - No buy cap. You can buy as many as you want
